

CSC 180-01 Intelligent Systems (Fall 2022)

Project 0: Meet Your Peers!

Due at 10:00 am, Friday, September 16, 2022

1. Problem Formulation

In this project, you make a short PowerPoint presentation video (2-3 minutes) to introduce yourself to the class. Share your instructor the video and the PowerPoint document to the discussion forum. Reply to at least two of your peers. **Note that all the following course projects will be group-based so this ice-breaker project aims to help your classmates know you and you know your classmates for you to find your partner(s).**

2. Software

You may use any screen recording software (such as Zoom) to record your presentation. Then you can upload your video file to any video hosting platforms for sharing (such as Google Drive or YouTube).

3. Requirements

- Your presentation should include at least the following **five PowerPoint pages** (but not limited to):
 1. Introduce yourself, your picture and a short bio
 2. One (at least) of your favorite AI applications/software or AI apps on smartphones
 3. Explain (or just guess) how that AI was built technically
 4. What kind of AI you want to build after completing this course, and
 5. One fun fact about you from these four arenas of your life, personal, professional, academic, and civic.
- You can be creative with how you put together your video. **I strongly encourage you to be on camera so we can know each other better.** If you are very uncomfortable being on camera, you can be creative in how you present yourself to your class. This is about you and should reflect who you are.
- Please **do not** upload the video directly to the discussion forum since that will count against the course storage space quote, considering that we will make a few presentations to the class for all our big data-based projects. **Your video should be hosted somewhere at the cloud,**

e.g., Zoom Cloud, YouTube, Google Drive, and you **only post the link** to the discussion forum.

- Test your video to make sure it is accessible from the link once you share the link.
- Be you!!! This is the most important part of the project. Everyone has a different style - be just who you are in the classroom!
- **Reply to at least two of your peers before 11:59 pm, Monday, September 19, 2022**
- Have fun!

4. Deliverables:

- (1) (40 points) Your PowerPoint document**, which should be posted to the discussion forum, together with the link to your video.
- (2) (40 points) The shared link to your video (2-3 minutes)**
- (3) (20 points) Reply to at least two of your peers before Monday, September 19, 2022**

The PowerPoint document and the video link must be submitted to discussion forum on Canvas before

10:00 am, Friday, September 16, 2022

NO late submissions will be accepted.
