

For this exam (Midterm 1), you will be allowed to rework the exam to earn back credit. You are eligible to earn up to 40% of your missed points by turning in complete, correct, and organized solutions to all problems and multiple choice. You must show your work to get credit. Your answers for the multiple choice questions must be justified with either equations or explanations.

Here is how your new score will be calculated:

If you earned 35 of 60 points on the exam (58%),
It is possible for you to earn back $(60-35)*0.40 = 10$ points.
Your exam score would now be 45 out of 60 (75%).

Here are the rules:

1. You must turn in solutions to **ALL FOUR** problems and all 5 multiple choice, regardless of how you did on those questions on the exam.
 2. You must write out the solutions in detail, showing your work in a clear manner.
 3. **Each problem should start on a separate sheet of paper.** Be sure to write your name on each sheet and to staple your solutions together. The multiple choice questions can be on one sheet of paper but all problems must be on separate sheets.
 4. **Do NOT include your original exam with your corrections.**
 5. **If your score was 51 or higher,** then you do not need to turn in corrections to get the points. You will still get the points back (a maximum of 3.6 points) but don't need to do the work.
- If your solutions are clear, complete, and correct, you will earn back 40% of the points you missed.
 - If your solutions are incomplete or incorrect but a significant amount of work was done, I can choose to award 20% of the points missed back to you
 - Otherwise, you will not earn any points back.

Solutions must be turned in on Canvas in the assignment labeled "Midterm 1 Corrections" in PDF form **by Friday November 13, 2020.**
