Player Functions Test/Firefox	18
Player Functions Test/Chrome	19

These tests verify the functionality of the advanced search and the embedded audio player on Chrome and Firefox browsers using Selenium testing on Linux.

Automated Selenium Testing

A debug option is available for each test (“-d” or “--debug”). This will pause execution until the tester presses Enter in the terminal. Otherwise, the test will automatically pause execution for a few seconds after each action.

1. Search Test/Firefox

1.1. Brief Description of Test

Using a Firefox driver, Selenium navigates to the search page, and inputs several queries into the search bar.

<https://github.com/reelradio/tests/blob/main/search-firefox.py>

1.2. Expected Behavior

The test passes four queries: “Tom Shannon”, “Sacramento”, “tina delgado”, and the empty string. The first three should return results, and the last one should return no results.

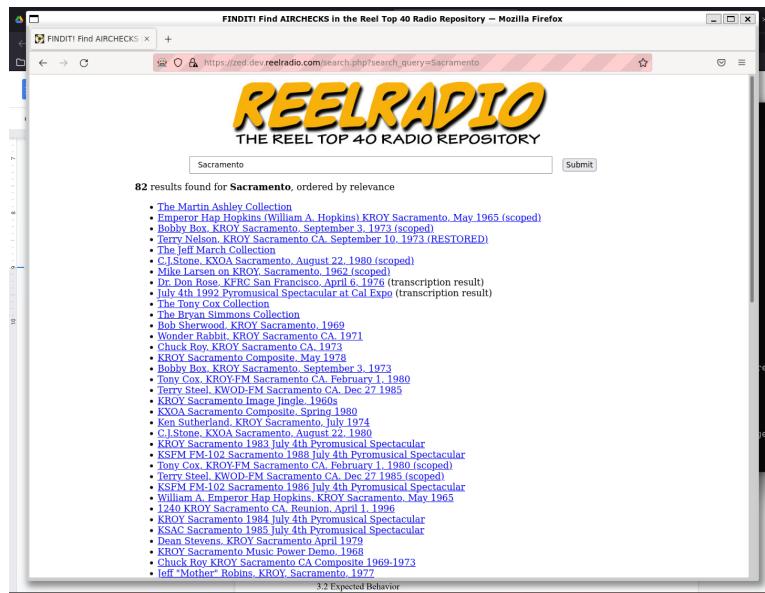

1.3. Tester Name

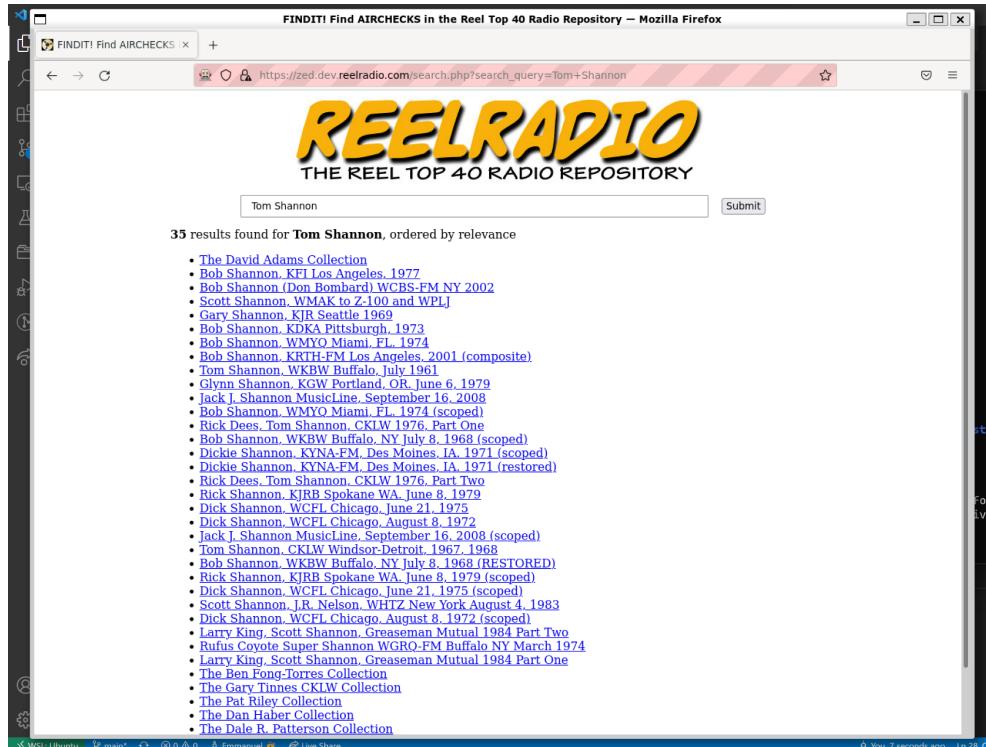

Emmanuel Castrejon

1.4. Date Tested

05/09/2022

PURPOSE Founded in 1996, this online aircheck museum is operated by REELRADIO, Inc., a non-profit 501(c)(3) organization. The primary function of REELRADIO is archival and educational. Our focus is Top 40 radio from 1955 to 1989. Our aircheck exhibits are recordings of one-time radio broadcasts, both full-length and "Scoped". Scoped airchecks are shorter in length and do not include musical performances.

Reel Top 40 Radio Repository Collections – Mozilla Firefox

collections

The Repository is comprised of collections and singular contributions from true devotees of the grand and glorious days of Top 40 Radio!

The contributors represent the very heart of this project by their willingness to contribute their time, tapes, pictures and descriptions for this online museum. The [FAQ](#) focuses on exhibits, but you may also access these treasures by visiting the individual [Collections](#), or our [Golden Gifts](#) section, or by using our [FINDIT](#) page to locate a favorite DJ, Station, City, State or Date. The Repository is dependent on the efforts of many contributors. We are forever thankful for the opportunity to host private collections for the enlightenment, entertainment and benefit of all.

The David Adams Collection

[By David Adams]

As the son of **Bob Shannon**, I guess you could say I was born into radio on April 2, 1971. Anyway, it certainly didn't hurt.

My first on-air experience was at **KDWB** Minneapolis/St.Paul, when the legendary **Wolfman Jack** picked me to voice a series of promos for his syndicated show. The line? "*Wolfman Jack is a gas!*" I was just four years old, and he didn't pay me a dime. Talk about violating the child labor laws...

But my first actual paid job came at the age of five when I co-hosted a **KFI** remote with my dad live from the L.A. County Fair in the spring of 1976. Since then, my journey into radio has taken me to **KSBR** in Orange County, News/Talk **KRLA** and **History Quest Productions** where I co-produce and narrate documentaries .

A few years ago I came across an enormous collection of airchecks in the production room labeled "Shannon", and discovered a few hidden treasures treasures including a station composite of **KDWB** and the "*Monkees at KRUX*".

The collection also included a collection of tapes labeled the "Shannons of Top Forty Radio" which included **Tom, Bob and Don**.

Enjoy!!

7. Player Functions Test/Firefox

7.1. Brief Description of Test

Using a Firefox driver, Selenium navigates to an exhibit and begins playing it. It then uses various audio controls

<https://github.com/reelradio/tests/blob/main/player-func-firefox.py>

7.2. Expected Behavior

A valid log in is required to run this test. Selenium will log in and navigate to an exhibit and begin playing. After some time, it should pause the exhibit, then begin replaying it. It should then change the volume to 50%, then to 0, then to 25. It should then seek the playback to 1:00, then to 20:00.
